Profile

Full stack software engineer with a front-end focus on structure, aesthetics, and performance. Experienced across W3C Verifiable Credentials, large-scale GIS platforms, and reusable React component libraries.

Experience

Digital Bazaar | October 2023 - Present

Software Engineer

Full stack development centered on W3C Verifiable Credentials.

Veres Wallet - W3C Verifiable Credential wallet.

- Shipped QR code scanning for credential capture, credential detail views, and dynamic render-method image display.
- Led a UI redesign and its implementation to modernize the look and feel.

VC Playground - Public platform for issuing and verifying example verifiable credentials.

- Create, update, and maintain verifiable credentials, queries, and JSON-LD contexts powering the playground's issuing and verification flows.

Woolpert | September 2022 - October 2023

Application Developer III

Lead front-end developer focused on application structure, aesthetics, and performance.

NavPortal - Hydrographic data platform for the US Army Corps of Engineers.

- Combined React, ArcGIS, Koop, and Elasticsearch to render and manipulate GIS data with dynamic visualizations, filtering, searching, and custom widgets.
- Maintained and refined a large-scale reusable Material-UI component library for a cleaner, more extensible front-end.

Leverstack LLC (formerly James M Easter LLC) | January 2022 - Present

Owner & Engineer

Deliver full stack web and mobile applications customized for clients.

Secure Care Connect - Verifiable credential health care application.

- Delivered end-to-end development and a mobile-friendly Vue.js design, with weekly progress presentations through production release.

Winterfest Mobile App - Interactive mobile conference application.

- Polls the audience, tallies votes, and displays thousands of results within seconds, alongside schedules, news, and virtual raffles.

Optimal GEO | August 2020 - September 2022

Software Engineer

Front-end lead React developer and presenter for company contracts.

Skills

Languages: JavaScript, TypeScript, Python

Front-end: React, React Native, Vue, Redux, Material-UI

Back-end & Data: Node.js, Elasticsearch, ArcGIS, JSON-LD

Education

Operation Spark | Certificate, Full Stack Development | December 2019 - May 2020

University of New Orleans | Master of Music | August 2014 - December 2016

Harding University | Bachelor of Arts | August 2008 - August 2012

Awards

- **Elastic Excellence Award**, 2021 - Awarded for work on NavPortal.
